DATA GOVERNANCE

DATA GOVERNANCE SPECIAL INTEREST GROUP

Time Capsule from November 2019

Thanks to Karen Meohas & George Firican for the idea

Some suggested decisions

From our initial DG-SIG meeting

2019 WHITEBOARD NOTES FROM THE BREAKOUT GROUPS

- Should DAMA-Vancouver and the DG-SIG integrate?
  - Consensus to have them integrated
  - Quarterly meetings – DAMA 9-11:00, DG-SIG 11-13:00
  - Shared logistics – subcommittee?
  - Costs can be covered thru Premium membership
  - Shared membership system (Wild Apricot)
  - Big vs Small organizations – consensus to muddle thru
- Memberships & confidentiality
  - Some worries about sharing in front of non-DG staff
  - Do a membership survey – questions on DG maturity, org size, capabilities

- Education
  - Discussion of a peer study group for the CDMP – now in 4th year!
- Sponsorship
  - Could cover cost of door prizes, coffee, speaker fees & expenses
- Recruiters
  - No, but possibly at the socials
- Vendors
  - Some said vendors could do presentations on their stack
  - Others said no to pitches of platforms
  - Maybe have them come in to sponsor an exchange of experiences by customers

2019 Whiteboard Notes (continued)

- Education
    - Discussion of a peer study group for the CDMP – now in 4th year!
- Sponsorship
    - Could cover cost of door prizes, coffee, speaker fees & expenses
- Recruiters
    - No, but possibly at the socials
- Vendors
    - Some said vendors could do presentations on their stack
    - Others said no to pitches of platforms
    - Maybe have them come in to sponsor an exchange of experiences by customers

- Topic Ideas
  - We should reach outside the Lower Mainland for thought leadership
    - This requires sponsorship so that we can cover travel and expenses for speakers
    - Begs the question of the non-profit organization with a bank account for DAMA
  - Data Governance versus Data Stewardship nomenclature – naming standards
  - Capability maturity models for DG
  - Governance differences from the perspective of IT versus business.
  - Advice for starting DG at an organization
  - How to sell it to business?
  - Success and failure stories
  - Integrating multiple sources of data
  - Best practices
  - DG for Artificial Intelligence and Machine Learning
  - DG as a culture – how to facilitate organizational change

- Confidentiality regarding discussions
  - We don't want folks to be sharing what they hear in our candid discussions
  - Maybe we could set up some sort of implied Non-Disclosure Agreement
  - Maybe model it on EventBrite's?
- Tools
  - Tools never even came up as a topic in any of the breakout groups!
  - Good to know that folks understand that Data Governance is a continuous organizational change journey and not a tool driven revolution.

NEXT STEPS   DG-SIG

- Confirm our interest – purpose, scope
- Potential members – quick vote
- Choose a platform
- Establish leadership
- Set up communication channels
- Plan activities
- Promote the group
- Establish guidelines
- Launch and Iterate
- Maintain engagement
